PERSONAL PROJECTS

Project: Blog your trip

- This is a web-based application, where end user can come and blog their trips and user can visit another blogger blog as well.

Roles and Responsibility: I have worked for design and development both.

Technologies used: HTML, CSS and jQuery to design the frontend.

Application Link - [A Pen by Abhinav Pal \(codepen.io\)](#)

Project: Online Calculator

- This is a web application which provides online calculator to the end user. Where user can use it to calculate basic mathematical operations.

Roles and Responsibility: End to end development.

Technologies used: HTML CSS and JavaScript to design this website.

Application Link - [A Pen by Abhinav Pal \(codepen.io\)](#)

Project: Contact Manager App

- This application is useful to managing contact like telephone directory where user can store their contacts with details. User can add new contacts and all saved contact will be listed in a queue manner. user can find contact by entering three to four characters on contact name and user can delete contact.

Roles and Responsibility: End to end development.

Technologies used: used "C" language and "C files" to save the contact details in the database.

Project: Daily Task Manager

- Developed a web application, which helps end user to manage their daily task. Also the user can add complete to-do list for the day with description and delete task from the list after completing task.

Roles and Responsibility: End to end development.

Technologies used: HTML CSS and JavaScript to design this website.
